Education

BABA MASTNATH UNIVERSITY, ROHTAK
2026

Bachelor of Technology in Computer Science & Engineering

June 2022 – July

Percentage - 91

RSP COLLEGE JHARIA, DHANBAD
2021

Senior Secondary (12th BOARD), Science Stream

April 2019 – May

Percentage - 63

K.D INTERNATIONAL SCHOOL, RAJDHANWAR
2019

Secondary (10th grade)

April 2018 – May

percentage - 80

Relevant Coursework

- Data Structures & Algorithms
- Operating System
- Object Oriented Programming
- Database Management System

Experience

Bharat Intern
2024

June 2024 - July

Full Stack Developer Intern

Virtual

- **Structured Web Form Creation:** Developed a project which demonstrates my ability to build-friendly and structured web forms, a foundational skill in web development.
- **Financial Tracking Application:** This project reflects my ability to design and develop an application solving practical problems, showcasing problem-solving and project design skills.
- **End-to-End Development:** Frontend and Backend Integration, displaying my understanding of full-stack development principles.

Avani Enterprises
2025

June 2025 - July

Full Stack Developer Intern

Remote

- **Frontend Development:** Built responsive web interfaces using React.js and Tailwind CSS. Implement React Router For smooth navigation and ensure mobile-friendly, user-centric UI designs.
- **Backend & API Integration:** Developed an integrated RESTful APIs using Node.js, Express.js, and MongoDB. Handled authentication (JWT), data operations (CRUD), and connected APIs with the frontend for dynamic functionality.

Projects

Twitter API | *NodeJS, ExpressJs, SQLite* | [Project link](#)

Feb 2025

- Created a robust twitter-like backend application utilizing Node.js and Express.js, with SQLite as the database.
- Implemented secure user authentication and authorization mechanisms to ensure data integrity and user privacy.
- Structured and managed relational database schemas for users, tweets, followers, replies, and likes, facilitating efficient data retrieval and manipulation.

Nxt Trendz | *ReactJS, React context, API Integration* | [Project link](#)

July

2025

- Integrated an e-commerce web application inspired by platforms like Amazon and Flipkart, using React.js, JavaScript, and CSS.
- Organized user authentication and authorization with JWT tokens, ensuring secure access to various features.
- Designed and developed multiple pages and routes, including Login, Products, Product Details, and Cart, utilizing React Router components such as Route, Switch, and Link.

Technical Skills

Languages: C, C++, Python, SQL, HTML, CSS, JavaScript

Developer Tools: VS Code, Git, GitHub, Jupyter Notebook

Technologies/Frameworks: ReactJS, Node.js, ExpressJS, Tailwind, MongoDB, SQLite

Development Areas: Full Stack Development, API Integration, Authentication (JWT), Responsive Design
